EDUCATION

University of Transportation Technology   October 2014 - June 2018

Specialization: Information Technology

GPA: 2.5/4

WORK EXPERIENCE

Misa JSC   01/2021 - Now

Devops(Software engineer and Builder) , Dev Lead

Technology: ReactJS, ASP.NET Core 5, MySql, NoSql
Tools: Visual Studio 2019, Visual Studio Code, , Docker, DbForge, MongoDB, Postman, XMind, Adobe XD
Experience:
  - Project name: AMIS aiMarketing
  - Team Size: 30
  - Project description: Marketing Automation Tool in Inbound Marketing
  - Role: Devops(Software engineer and Builder) , Dev Lead
  - Responsibilities:
    + Write construction solutions using Xmind
    + Code front end using ReactJS
    + Code back end using ASP.NET Core 5
    + Building database using Sql and NoSql
    + Manage work progress and product acceptance of team members
    + Create an Automated CI/CD Pipeline in Jenkins
    + Use Docker , Kubernetes to build React Web UI and services .NET core
    + Use azure devops to manage tasks and resources

FPT Sofware   08/2020 - 12/2020

Software developer, Tester

Technology: Oracle PL/SQL
Tools: SQL Developer
Experience:
  - Project name: NSK_PLSQL_2020
  - Team Size: 10
  - Project description: NSK_New backbone system(Oracle PL/SQL)
  - Role: Software developer, Tester
  - Responsibilities:
    + Building an environment to code Oracle Pl Sql with Oracle 12.0.0.1 on Windows Server 2012 R2
    + Study Design/Coding solution
    + Coding PL/SQL Procedures and Packages /review/fix source code
    + Unit Testing with SQL Developer
    + Create/Review/Update Test case
    + Create/Review/Update Test report
    + Delivery to customers, reciprocal with comment from customer
    + Solve common issue of the whole project, fix bug UAT from customers

FPT Sofware   12/2019 - 08/2020

Software developer

Technology: VB.NET, VB6, Git
Tools: Visual Studio 2017, Visual Basic, Sourcetree, Spread, VMware
Experience:

- Project name: OKS
- Team Size: 60
- Project description: Migrate the system from VB6 to VB.Net
- Role: Sub-Leader team of 10 people
- Responsibilities:
    + Coding : Fix bug compile, fix bug runtime, apply design pattern, apply quality up,...
    + Create check list coding document, create checklist UT GUI document
    + Create investigate document, training tester reading code comprehension
    + Support, training, review code, document for team members, cover the work situation of the members
    + Solve common issue of the whole project, fix bug UAT from customers

FPT Sofware   07/2019 - 12/2019
Software developer

Technology: C#.NET, MS-SQL
Tools: Visual Studio 2019 , MSSQL 2019, Git extension, Azure DevOps
Experience:
  - Project name: Marken Maestro
  - Team Size: 30
  - Project description: Marken Maestro is the core management system for Marken's Logistics services. It also supports client billing throughout the business.
  - Responsibilities:
    + Perform fix tasks and service requests from customer.
    + Writing SQL commands to get data and create reports.
    + Modify shell scripts to perform tasks from customer.
    + Perform fix tasks such as: check log files of servers, create report…
    + Perform service requests from customer such as: register new user into system, update configuration files, changed user's rights in the system…

Viegrid Jsc   08/2018 - 7/2019
Software developer

Technology: Wordpress, C # .NET, MS-SQL, Python 3
Operating System: Ubuntu 16.04 LTS, Ubuntu 18.04 LTS
Tools: Visual Studio 2017, Visual studio code, MSSQL 2012, Git, SVN, VNC Viewer, Draw.io, Xampp, MVC, WinSCP, Putty, OpenSSH, Pycharm
Experience:
    - Build website http://medsub.viegrid.com/ with wordpress
    - Build 2 admin interfaces with MVC
    - Create tool to generate questions automatically by python 3 and pack into service
    - Call the service to generate questions by API and design the interface to automatically generate questions in the system of knowledge tree http://qa.viebooks.com/ with MVC
    - Research on the deep learning library tensorflow translation Kural-GPU neural machine and test boys with bilingual data on ubuntu 16.04 LTS
    - Ability to write documents: Instructions for use, installation instructions, FRS (Software requirements specification document), URS (Document specifying user requirements)
    - Ability to work in groups, actively contribute ideas in briefings
    - Good presentation skills
    - Ability to install operating systems, fix software and hardware errors
    - Support trainning interns

Hosting Viet   06/2018 - 8/2018
Software developer

Technology: C # .NET, Angular 2, MS-SQL
Tools: Visual Studio 2017, Visual studio code, MSSQL 2012, Git, Draw.io
Experience:
    - Build Webform GUI using Angular 2 with IDE as Visual studio code
    - Coding C # and SQL
    - Using Entity framework 6

Implementation of Graduation Projects   03/2018 - 06/2018

Topic: "Building a system to manage indicators of KPI work evaluation at software technology companies".
Function:
- HRM
- Project management
- Managing KPI index.
Technology: C # .NET, Winform.NET, SQL
Tools: Visual Studio 2017, MySql Workbench 6, DevExpress 17, MSSQL 2012, GitHub, Draw.io
Experience:
- Build Winform GUI with DevExpress tool
- Coding C # and SQL
- Familiar with OOP, UML
- Some tools like MS SQL studio, GitHub on Visual Studio, Draw.io, MySQL Workbench can be used.

ACTIVITIES

Volunteer Group of Information Technology Faculty   October 2014 - August 2018

Volunteers

- Gather gifts and distribute to people in remote areas.
- Share, motivate them to overcome difficult times, help them have positive thoughts.

HONORS & AWARDS

- 100m gold medal athletics Phu Dong Healthy Association in Thanh Xuan district. 2010   Oct 2014-August 2015
- Runner up information technology football league 2017

SKILLS

Programming language	- ReactJS, ASP.NET Core 5, Oracle PLSQL, C #, SQL, Java, HTML, CSS, JavaScript, Angular 2, Python 3
Tool	- Visual Studio 2019, Visual Studio Code, DbForge, MongoDB, Postman, Docker, XMind, IntelljJ IDEA , Dev Express , MySQL WorkBench , MSSQL Studio , Github, SVN, Draw.io, MVC, WinSCP, Putty, OpenSSH, Pycharm, Sakura, SQL Developer, Excel,...
Operating system	- Ubuntu 16.04 LTS, Ubuntu 18.04 LTS, Windows Server 2012 R2
IT Support	- Ability to install operating systems, software and hardware repair, training support for interns
Soft skills	- Present and write documents, communicate well.
Devops skills	+ Create an Automated CI/CD Pipeline in Jenkins + Use Docker , Kubernetes to build React Web UI and services .NET core
Tester skills	+ Create/Review/Update Test case + Create/Review/Update Test report + Keep Evidence
IT Support	- Ability to install operating systems, software and hardware repair, training support for interns
English	- Ability to read documents in English and basic communication

HOBBY

Soccer, Game, Programming   Soccer, Game, Programming

PROJECTS

AMIS aiMarketing

(1/2021 - Now)

Customer	Misa JSC
Description	AMIS aiMarketing - Marketing Automation Tool in Inbound Marketing
Team size	30
My position	Devops(Software engineer and Builder) , Dev Lead

	+ Code front end using ReactJS + Code back end using ASP.NET Core 5 + Building database using Sql and NoSql + Manage work progress and product acceptance of team members + Create an Automated CI/CD Pipeline in Jenkins + Use Docker , Kubernetes to build React Web UI and services .NET core + Use azure devops to manage tasks and resources
Technologies used	ReactJS, ASP.NET Core 5, MySql, NoSql

NSK
(08/2020 - 12/2020)

Customer	NSK
Description	NSK_New backbone system(Oracle PL/SQL)
Team size	10
My position	Software developer
My responsibilities	+ Building an environment to code Oracle Pl Sql with Oracle 12.0.0.1 on Windows Server 2012 R2 + Study Design/Coding solution + Coding PL/SQL Procedures and Packages /review/fix source code + Unit Testing with SQL Developer + Create/Review/Update Test case + Create/Review/Update Test report + Delivery to customers, reciprocal with comment from customer + Solve common issue of the whole project, fix bug UAT from customers
Technologies used	Oracle PL/SQL

OKS
(12/2019 - 08/2020)

Customer	OKS
Description	Migrate the system from VB6 to VB.Net
Team size	60
My position	Sub-Leader team of 10 people
My responsibilities	+ Coding : Fix bug compile, fix bug runtime, apply design pattern, apply quality up,...+ Create check list coding document, create checklist UT GUI document + Create investigate document, training tester reading code comprehension + Support, training, review code, document for team members, cover the work situation of the members + Solve common issue of the whole project, fix bug UAT from customers
Technologies used	VB.NET, VB6, Git

Marken Maestro
(7/2019 - 12/2019)

Customer	Marken Maestro
Description	Marken Maestro is the core management system for Marken's Logistics services. It also supports client billing throughout the business.
Team size	30
My position	Developer
My responsibilities	-Perform fix tasks and service requests from customer. -Writing SQL commands to get data and create reports. -Modify shell scripts to perform tasks from customer. - Perform fix tasks such as: check log files of servers, create report

	-Perform service requests from customer such as: register new user into system, update configuration files, changed user's rights in the system…
Technologies used	C # .NET, MVC

Build a system of VMEDSUB version of Community and Community Server

(2/2019 - 4/2019)

Customer	Viegrid JSC
Description	Vmedsub - Translation machine and voice translation to automatic subtitles
Team size	1
My position	Developer
My responsibilities	- Design interface of the introduction, building database page - Interface design and data administration interface functions
Technologies used	Wordpress, C # .NET, MVC

Build VMEDSUB system of Enterprise Server version

(11/2018 - 1/2019)

Customer	Viegrid JSC
Description	Vmedsub - Translation machine and voice translation to automatic subtitles
Team size	2
My position	Developer
My responsibilities	- Design interface of the introduction, building database page - Interface design and data administration interface functions
Technologies used	C # .NET, MVC, MS-SQL

Generate questions automatically

(8/2018 - 10/2019)

Customer	Viegrid JSC
Description	Knowledge tree - Generate automatic questions
Team size	2
My position	Developer
My responsibilities	database building, software code
Technologies used	Python3, C # .NET, MVC

Internship project

(6/2018 - 8/2018)

Customer	Hosting Viet
Description	Upgrading the KPI workflow measurement management system
Team size	1
My position	Developer
My responsibilities	design project, database building, software code
Technologies used	C # .NET, Angular 2, MS-SQL, Entity framework 6

Graduation thesis

(4/2018 - 6/2018)

Customer	Faculty of Information Technology University of transportation technology

	company.
Team size	1
My position	Developer
My responsibilities	design project, database building, software code
Technologies used	C # .NET, Winform.NET, SQL
